

10/4/2022

Although I think everyone has a thoughtful reason to vote no, when it comes down to it, tonight there are two people who would greatly benefit from a yes vote. My neighbor and myself live in fear of getting flooded again whenever we have a substantial rain. I remember opening my cellar door and seeing something float by. That is how I found out my basement was flooded. My neighbor has been flooded many times at great expense and time and effort to do the work that is involved in cleaning up and repairing the damage. No one here tonight should have to live like that.

I understand a yes vote tonight would allow an association to address this problem which would involve piping the rushing water that comes down the hill to our properties underground away from our houses.

Please vote yes on our behalf.

Thank you.
